What is CCR?

The Central Contractor Registration (CCR) is the primary vendor database for the Department of Defense (DoD) and an increasing number of Federal Agencies. Current and potential government vendors are required to register in CCR in order to be eligible for contract awards and payments by these agencies. CCR facilitates electronic payments by providing the vendor entered and maintained data found in CCR to authorize federal agencies to carry out electronic funds transfer (EFT).

How to Register

Vendors — Complete your one-time registration to be eligible to win contracts from the DoD and an increasing number of Federal Agencies! Here's how:

- Visit the CCR website at www.ccr.gov. View the on-line Handbook for details on data required.
- When you are ready to register, click on "New Registration", then fill out and submit the online registration. The whole form should take you about 20 minutes.
- The "CCR Point of Contact" you designate will get a password (TPIN) in the mail, which he or she must use to access your registration.
- Keep your information current by updating your registration at least yearly.

What You Will Need

In order to complete your registration in CCR, you will need to have some information about your company, including:

- DUNS Number
- CAGE Code (if already assigned)
- Tax ID Number (TIN)
- General business information
- Codes (i.e., NAICS, SIC, FSC) for the goods or services your company provides
- Electronic Funds Transfer information

See below if you are not sure where to find this information

Why CCR Works

CCR is a self-service database

- Vendors have access to their data 24x7
- Authorized government personnel obtain data as needed
- CCR is user-friendly

CCR has accurate and up-to-date information

- Yearly renewal required to keep information current

CCR facilitates paperless acquisition

- Electronic payments are made using the information from CCR
- CCR decreases paperwork by electronically disseminating collected information to other eBusiness systems

How to Receive CCR Data

There are three types of data categories, depending on the method of data retrieval and your level of access:

- Public — All of our publicly available data in one consolidated source
- Proprietary — Proprietary data available to authorized government users only
- Sensitive — EFT data available to authorized government users only

You can access CCR data in various ways:

- CD-Rom — Purchase public information on a monthly or yearly basis, proprietary available quarterly or yearly
- CCR Tools — See read-only information via the Internet
- DataMart Integration — Link directly into your procurement or financial systems

CCR Goes Federal!!

CCR is being used by an increasing number of Federal Agencies as their source of vendor information. So, it is even more important that your company is listed and your registration is up-to-date.

Solicitation Notification Program

If you designate a Government Marketing Point of Contact on your registration, you automatically join the Solicitation Notification Program offered by DoDBusOpps. Through this program, you will receive automatic email notices when new DoD solicitations are released that match your company's business.
